

Velvet STEEL

"not easy to handle"

Velvet STEEL was founded in 1993. Velvet STEEL are 5 guys playin' Blues-/Rock in a German band in Karlsfeld/Dachau near Munich. Meanwhile 3 albums as well as 1 single CD and numerous compilations have been published by Velvet STEEL. The debut album "Explorer 2205", the original motion picture soundtrack for the TV-science-fiction-movie was released in 1995.

Some highlights during 16 years of Velvet STEEL are the nomination for the "German Rock- and Pop Price 1997" for Bavaria, the performance at the "Rock im Circus 97" festival in the "Circus Krone" building Munich, the tripple jump in the semi-final of the largest European newcomer festival "Emergenza Rock" 1997, 1999 and 2004 as well as numerous further live shows/radio/TV-appearances and CD publications! The 2nd album, published in 2001, was called "Home of the brave". In May 2002 they were part of the "stars in sight 4" sampler which was an edition of 15.000 CDs, including their song "Diamond of the desert"! One month later they were also represented with this song on the "IDPC Best of Collection". Early 2003 the STEELER's got, due to the positive resonance of their 2nd album, signed by the record label "Songhouse" recording their first single CD "Whisper in the night"

Afterwards the STEELERs been on tour and presented among other highlights their new single "Caught in time" as well as the associated music-video-clip. This was videotaped at the "Bavaria Filmstudios" in September 2005 and published on the DVD "Velvet STEEL -10th Blues /Rock Anniversary" in a limited edition version with book.

In June 2009 they finally released their long awaited 3rd album "not easy to handle"...

Just to excerpt only one press comment here for a description of the band and their music:

„... if Velvet STEEL, with lead-singer Robert „Rob the voice“ Steiner, drummer Bernd „Bernie“ Bachhuber, bassman Markus „Schmeidl“ Schmid and the two guitarreros Martin „MartyParty“ Punsch and Jörg „CaptainKörg“ Medwed, with their power-loaded stage-show begins to play, a colourful mix of „steel-hard“ rock music and „velvet“ ballads packed with plenty of blues heads over the stage, their fans can't be stopped anymore. Don't get frightened if the drive goes immediately into your legs, you start singing along and the beat pervades your body. Only residual risk: You become a „STEELER' s "fan!"
